## 1 Information

### 1.1 General information

This document is to be used when ordering spare parts for the heaters listed on the title page, to the exclusion of all liability claims.

Depending on the version or revision status of the heater, differences may occur compared to this documentation. Please check this before ordering the spare parts and take any possible differences into account.

### 1.2 Reference documents

#### Technical description

Describes the function and proper installation and contains all information necessary for safe operation of the heater.

#### Repair instructions

Contain the necessary information for troubleshooting and for repair of the heater.

#### Installation recommendation

Describes vehicle-specific installation situations.

#### Installation Instructions Plus

Supplementary information on heaters and control units.

### 1.3 Determining the quantity required for the order

The information in the “quantity per unit” and “quantity per SU” (sales unit) columns is used to determine the quantity of a spare part required and the SU (sales units) to be ordered.

#### Quantity per unit

The number in this column indicates how many of the spare part concerned are installed in the whole unit.

#### Quantity per SU

The number in this column indicates how many of the spare part concerned are contained in one SU (sales unit).

#### Order No. (SU)

The order number refers to an SU.

### 1.4 Using the nameplate to determine the production date

To place the spare parts order correctly, in some cases it is necessary to determine the production date of the heater before ordering the spare part. There are two options for doing this on the heater's nameplate.

#### 1 Determination of the calendar week

- Representation of the production calendar week as a four-digit number (e.g. “1118” = calendar week 11 in year 2018)

#### 2 Determining the date

- Scan the QR code with a QR code reader.
- The production date is given by the 8-digit representation of the date in the third from last position of the read out text (e.g. “14032018” = 14 March 2018)
